Construction on Track at Health Department

New parking lot ready for visitors

St. Charles County, Missouri – Construction and renovation is moving along at the St. Charles County Department of Community Health and the Environment. Earlier this week, crews finished work on a new, expanded parking lot around the building at 1650 Boone's Lick Road. The additional spaces are designed to eliminate the need for citizens to park on side streets during visits to the health department.

While the majority of outside work is complete, crews are still working on the interior, so construction equipment and supplies will still be evident around the building. As the project moves forward, some entrances may be closed, and services may be moved to a different location within the building. However, the department will continue to offer all services to residents. Citizens are asked to be patient and follow the signs posted to expedite their visit. Updates on the status of construction will be provided as work progresses.

For more information about the St. Charles County Department of Community Health and the Environment, call (636) 949-7400 or visit www.scchealth.org.
